Dr. William Hendricks

Dr. William Hendricks is an Assistant Professor of Integrated Cancer Genomics at the Translational Genomics Research Institute (TGen) in Phoenix, Arizona. Dr. Hendricks received joint baccalaureates in Literature and Molecular Biotechnology from Grand Canyon University and Arizona State University. He completed his doctoral and postdoctoral training at Johns Hopkins School of Medicine in the laboratories of Drs. Kenneth Kinzler and Bert Vogelstein before joining TGen in 2013 to develop programs in canine and human cancer precision medicine. His laboratory pursues genomics-guided drug development and precision medicine clinical trials in rare histological and molecular subtypes of human cancers including small cell carcinoma of the ovary, BRAF wild-type melanoma, and diverse pediatric cancers in addition to canine cancers including melanoma and osteosarcoma.
