

SATURDAY, 4 MAY 2002					
SESSION A			SESSION B		
7:30	Registration; Poster viewing				
	<b>Case Reports</b>			<b>Management</b>	
8:00	N.S. Ambrose	Defective down in commercial broiler chicks in the Fraser Valley of British Columbia	8:00	J. Sander	A study of <i>Pseudomonas aeruginosa</i> contamination in a commercial poultry hatchery
8:12	G. Cooper	<i>Hexamita meleagridis</i> in chukar partridges: suggestion of mucosal invasion	8:15	F. Sommer	Mortality problems in hatcheries: have they disappeared due to modern technology?
8:24	A.S. Dhillon	High mortality in layers as a result of clostridial enteritis	8:30	P. Rebolledo	The effect of humidity on incubation
8:36	P. Gazdzinski	Venereal colibacillosis (acute vaginitis) in turkey breeder hens	8:45	T. Marsh-Johnson	Impact of air quality in poultry facilities on human and bird health
8:48	S. Heins Miller	High feed conversion: a reovirus case study	9:00	S. Mata	Managing the commercial layer
9:00	Z. Raviv	Magnesium intoxication in broiler breeder chicks	9:15	C.C. López	Effect of rearing period on male/female broiler feathering
9:12	N. Reimers	Gastric intussusception in laying hens	9:30	J.C. Valladares	Broiler deep pectoral myopathy
9:24	H.L. Shivaprasad	An outbreak of inclusion body hepatitis in broiler chickens	9:45 – 10:00	J. Serratos	Genotype-environment intergration in a laying line
9:36	S. Throne-Steinlage	Zygomycosis in layer pullets and cockerels			
9:48					
10-10:45	BREAK				
	<b>Molds, Mycotoxins, Miscellaneous</b>			<b>Growth Promotants, Miscellaneous</b>	
10:45	A. Valdivia	Efficacy of N-acetyl-cystein to decrease the effect of aflatoxin B1 feed poisoning in broilers		C. Rosario	Bacterial resistance to antibiotics
11:00	R. Márquez	<i>In vivo</i> evaluation of mycotoxicosis-inhibiting ability in poultry fed aflatoxin-, ochratoxin-, and T2 toxin-contaminated diets with the addition of <i>Saccharomyces cerevisiae</i> yeast and with manan-glucan-oligosaccharides (safmanan)		A. Sosa	<i>In vitro</i> MIC comparative evaluation of two phosphomycin-based antimicrobials against several bacterial species
11:15	A. García	The effect of ochratoxin, urea, and amprolium administration on broiler skin pigmentation		D.H. Chapman	The use of feed additives in broiler chickens in the USA
11:30	C.C. López	Methodology for fecal evaluation and interpretation in broiler houses		H. Cervantes	Incidence of pathological conditions in clinically normal broilers from different regions of the USA
11:45	Garcia-Espinosa	Histones as potential extracellular labeling molecules in poultry		R. Ferenc	Diagnostic pathology
12:00	I. García	Ammonia absorbent quality evaluation		R. Trueta	Status analysis of both the Mexican and US poultry industries
12:15	R. Cerda	Efficacy of 3-acetyl 4-isovaleryl tyrosin tartrate in the treatment of MG		F. Alonso	1994-1999 broiler meat import trends within NAFTA framework
12:30 – 1:30	BREAK / LUNCH				
1:30-2:15	<b>Guest Speaker - D. Bell</b>	<b>New technologies for the layer industry – the essential components of science and economics</b>			
2:15-3:00	<b>Guest Speaker – P. Lyons</b>	<b>Non antibiotic growth promotants</b>			
3:00	<b>Guest Speaker</b>	<b>CONASA</b>			
4:00	<b>CONCLUSION</b>
