F.A.R.M. Club hosts clinical rounds for students on Thursdays at 5pm. This is a great opportunity for students to apply what they are learning by hearing about real cases from the clinicians in the VMTH. Club members will be notified when Rounds will be held!

Calf Team
F.A.R.M. Club coordinates Calf Team, an opportunity for students to gain extra experience in C-Barn, the Food Animal section of the VMTH. Students sign up for after-hours shifts to help clinicians with emergencies and treatments. Club members will be notified when Calf Team sign ups occur!

Field Trips and Wet Labs
F.A.R.M. Club organizes many field trips and wet labs throughout the year. Our goal is to educate our members about the food animal industry, including current issues for producers as well as veterinarians. This year we have awesome educational opportunities lined up. Club members will have priority in signing up for these great opportunities!

F.A.R.M. Club Symposium
F.A.R.M. Club hosts an annual symposium for veterinarians, producers, and veterinary students. This year it will be on January 12th. Stay tuned for more information on this good opportunity to learn and network!

F.A.R.M. Club exists to provide extracurricular learning and networking opportunities for students interested in production medicine. We believe in providing utmost care for animals, while working to ensure a healthy, wholesome and safe food supply to benefit the world. We have the unique responsibility to bring sound scientific evidence to our future clients and to educate the consuming public about the food they eat. This mission begins in school and continues throughout our careers as food animal practitioners.
