Michelson Prize & Grants
Deadline for proposals are at three times a year, in March, July, and November

Found Animals is providing up to $50 million in multiple, multi-year international research grants through the Michelson Grants in Reproductive Biology for promising proposals in pursuit of a single dose, lifetime non-surgical sterilization product or technology for use in male and female dogs and cats that also ablates sex steroids or their action. Although grant proposals may be funded to study a nonsurgical sterilant in a single target species (cats or dogs), a single gender, or that does not ablate sex steroids, strong preference is given to proposals that could meet all of the Michelson Prize criteria. The Foundation seeks proposals for up to $250,000 USD per year for up to 3 years of funding.

United States Special Operations Command, U.S. Army Medical Research Acquisition Activity, Extramural Biomedical Research and Development

Deadline for application: March 15TH, 2013

The USSOCOM seeks novel biomedical solutions to preserve the high level of performance and save the lives of Special Operations Forces (SOF) in field environments. Any projects proposed must be unique to the requirements of SOF who typically conduct combat operations in austere, remote locations without timely access to medical evacuation or elevated levels of medical care. It is these far-forward and/or isolated operations that make SOF medicine unique and result in material solutions characterized by ruggedness, light weight, small volume, and low power requirements. USSOCOM is also interested in research that will lead to improved techniques and procedures that do not necessarily require new material.

2013-2014 Academic Senate Research Grant Programs

Deadline for applications: March 22ND, 2013

Announcing the annual Call for Applications for the Grants to Promote New Research Initiatives and Interdisciplinary Research ($10,000-$25,000), the Small Grants in Aid of Research ($2,000), and the Research Travel Grants ($800).

Important Notes: The 19920 funding source for Academic Senate Committee on Research (COR) grants has been changed to 07427 (opportunity funds) effective July 1, 2012. This change is in response to consolidation of general fund and Indirect Cost Return (ICR) fund numbers centrally on campus. All departments will be required to supply account numbers that will accept 07427 funding for all new grants awarded during the 2013-2014 academic year.

2013 Merial Veterinary Scholar Graduate Research Award

Deadline for application: April 30TH, 2013

This notice is to remind you of the Merial Research Award for Graduate Veterinarians. This award will reinforce Merial's mission to promote research in veterinary biosciences and reward those students who have excelled in their graduate or residency program. This award recognizes graduate veterinarians that have completed or will soon complete a PhD program or are in their final 1 to 2 years of residency training in the field of veterinary pathology, medicine, surgery, radiology/imaging, or laboratory animal medicine.
