

We are happy to accept brain and spinal cord biopsies and post-mortem tissue submissions for pathology examination. Submissions may be shipped in routine 10% neutral buffered formalin using a leak-proof container. Tissue submissions should be placed in a container large enough to accommodate the entire specimen.
PLEASE DO NOT COMPRESS TISSUE. If necessary, tissue may be trimmed using a fresh scalpel to fit into a container. Please submit this completed form, along with your sample to:

UC Davis Veterinary Medical Teaching Hospital – Neuropathology Service
